

**KOCAER STEEL  
FIGHTING AGAINST CLIMATE CHANGE AND  
ADAPTATION POLICY**

## Kocaer Steel

In order to determine and define the physical and transition risks arising from climate change and the steps that need to be taken to manage these risks, to take the necessary actions to implement climate change-related legislation, national/international standards and systems and to comply with sustainability strategies ;

- Fight and adapt to climate change in all areas of activity,
- Addressing the fight against and adaptation to climate change with the active participation of senior management, including the Board of Directors,
- Monitor from a collective perspective with working groups consisting of employees from different disciplines operating under the Sustainability Board,
- Include physical and transition risks arising from climate change into its own risk management system, to analyze risks and opportunities and to manage their consequences in the most accurate way,
- Actively contribute to the United Nations Sustainable Development Goals (SDGs),
- Science Based Targets Initiative ( Science based targets Initiative – SBTi ) and accordingly, to set targets and implement the necessary actions to reduce greenhouse gas emissions in line with the long-term goals of the Paris Agreement,
- Calculating, verifying and continuously improve the performance of annual greenhouse gas emissions according to the ISO 14064 Greenhouse Gas Reporting and Verification Standard,
- Supporting the Task Force on Climate-Related Financial Disclosures (TCFD) and conducting measurements and reporting accordingly,
- Supporting the Carbon Disclosure Project (CDP) and measuring, reporting accordingly,
- Commits to supporting the Task Force on Nature-Related Financial Disclosures (TNFD) and to measuring and reporting accordingly.
